

Word Ladders

The player is given a start word and an end word. In order to win the game, the player must change the start word into the end word progressively, creating an existing word at each step. Each step consists of a single letter substitution. For example, the following are solutions to the word ladder puzzle between words "cold" and "warm".

COLD → CORD → CARD → **WARD** → WARM

COLD → CORD → **CORM** → **WORM** → WARM

COLD → **WOLD** → WORD → **WARD** → WARM

You can find many examples of these online—some with clues to make it easier and some without.

A harder version of the game is to select 2 words and see how many steps it takes to get from one to the other—race a partner.
